Re: Wisconsin Regional Orthophotography Consortium (WROC)

To Whom It May Concern:

The Wisconsin Geographic Information Coordination Council (WIGICC) supports the Wisconsin Regional Orthophotography Consortium (WROC) project and the consortium's efforts to coordinate a statewide orthophoto program for 2010. The Council supports your work towards the goals of creating a sustainable orthophoto program that provides the structure for local, regional and state partners to participate.

Since 2005 Wisconsin's Regional Planning Commissions have promoted and facilitated efforts to establish a statewide orthophotography program. The WROC effort has reached out to many organizations across the state to establish a multi-participant, fairly administered program.

All levels of government use orthophotography in Wisconsin. In these tight budget times it is critical that we coordinate our efforts and pool resources as best as possible. By working together we are able to minimize duplication, increase our purchasing power, and provide useful data to local, regional and state partners.

WIGICC is pleased to lend it's support to help promote WROC, and to facilitate coordination of other like efforts within the state. If there is anything additional that we can do to assist the consortium, please let me know.

Sincerely,

Gregg Moore
WIGICC Chair
