

# DID YOU KNOW...

As part of the WROC program – an initiative that has led to an up-to-date statewide dataset – Ayres Associates can provide additional services customized to your city, county, or agency's needs.

These include:

- MrSID compression
- Image format conversions (e.g., .tif, .jpg, .ecw, .sid)
- Coordinate system conversions (e.g., state plane, county coordinates, WTM, UTM)
- E911 compatibility
- GeoTIFF conversions/translations
- Re-tiling/mosaicking to user-defined outputs
- Color infrared and 4-band creation
- Planimetric and topographic mapping
- Specialized color and contrast adjustments
- Display plots and other hard copy products
- Historical imagery geo-referencing
- WROC imagery user consulting – on site or via secured webinar.

**Contact Kirk Contrucci, CP, for more information on how you can maximize the value of your data through services like these.**
